

STICHTING YOUTH FOR SUSTAINABLE TRAVEL

FINANCIAL REPORT 2023

LATIN AMERICAN YOUTH SCHOLARSHIP

The majority of income and costs in 2023 were related to Latin American Youth Scholarship (LAYCS). The project received the following grants:

- European Climate Foundation Grant €100,000.00
- Climate Emergency Collaboration Group Grant €90,000.00
- Tenacious Award £20,000.00

Additionally the project received private donations from family members and individuals that support the project.

The majority of costs were for travel to and back from the climate conferences SB58, COY18 and COP29 for the participants, interpreters and organising team. Other costs were the interpreters during those climate conferences and online events in preparation. The last category of costs are for consulting fees for advisors in and to the organising team.

EXPLANE

ExPlane was finalised during 2023, spending the last of the grant received in 2021. The expenses in 2023 were costs of labour for freelancers running the campaign and subscriptions to design software for the communication outputs.

OTHER

The last category of costs worth mentioning are the administrative costs that were slightly higher this year than other years. Given the size of the LAYCS project we have had some extra support on administration in terms of consultation, administration software and translation of legal documents.
